

The College Pharmacy Compounding Quick Guide

Custom Compounding | Integrative | Orthomolecular | Nutritional | Environmental | Pain Management | Allopathic

The College Pharmacy Difference: Quality. Innovation. Experience. Since 1974.

In an industry that has evolved continuously over the last few decades, College Pharmacy has made it our mission to develop and provide high quality formulations and exceptional customer service to healthcare practitioners and their patients. As one of the most comprehensive compounding pharmacies in the U.S., the range of services that we offer our customers is surpassed only by our years of compounding experience. From biologically identical hormones to sterile injectables, and veterinary compounds to discontinued medications...We work closely with healthcare practitioners to provide innovative solutions for health and wellness success.

College Pharmacy's Compounding Services and Practices

College Pharmacy's compounding practices are both USP 795 and 797 compliant. Our testing protocol includes: potency, sterility, endotoxin, and fungal testing. Our sterile formulations are compounded in a state-of-the-art clean room and compounding lab that was fully renovated and updated in the summer of 2014.

- ✔ Dental Compounding
- ✓ Ophthalmic Compounding
- ✓ Pediatric Compounding
- ✓ Podiatry Compounding
- ✓ Veterinary Compounding

Competitive Pricing Without A Sacrifice In Quality Or Compliance.

The pricing of compounded formulations is influenced by many variables: technical expertise, quantity, dosage strength, route of administration, special compounding instructions, market price of bulk powders, etc. When choosing a compounding pharmacy, both price and quality of formulations are major factors in determining your selection. To this end, College Pharmacy strives to maintain competitive pricing while maintaining the high standards of quality that have established us as an industry leader for over 40 years. It is the compounding process, attention to detail, regulatory compliance, and the quality of the compounding components that continues to make our formulations exceptional.

Introduction & Specialty Formulations

The Compounding Quick Guide: A Snapshot of Capabilities.

For over 40 years, College Pharmacy has collaborated with leaders in the healthcare industry to create exceptional formulations that may not be readily available elsewhere. College Pharmacy works with more than 5,000 healthcare practitioners and 20,000 patients a year. Our Compounding Quick Guide provides a snapshot of our exclusive, specialty, and most commonly prescribed compounded formulations. It is by no means a complete formulary.

Understanding The Changes Within The Compounding Industry

It may be beneficial to become familiar with the sweeping compounding regulations associated with the Drug Quality & Security Act that was signed into law November 27, 2013. You may also want to become familiar with the evolving regulations that your respective state board of pharmacy is adopting in lieu of the Drug Quality & Security Act. *Important: Due to evolving regulatory standards, some specialty sterile formulations will have short "Beyond Use Dates" and additional testing fees.*

Formulation Availability

There are many factors that determine compounded formulation availability, these include: ingredient availability, new commercial product introduction, as well as evolving state and federal regulations. All formulations and services listed were available at the time of printing, but may change without notice. This Quick Guide does not imply continued availability. Please note: by law, compounding pharmacies cannot compound exact copies of commercially available products.

| Available Exclusively From College Pharmacy | | | | | |
|--|------------------------|---------------------|--|--|--|

Specialty Formulations: Sterile Injectables

The quality of College Pharmacy's sterile injectable compounding services is surpassed only by our years of sterile compounding experience. See "Environmental Medicine" section for additional formulations.

College Pharmacy's compounding practices are both USP 795 and 797 compliant. Our testing protocol includes potency, sterility, endotoxin, and fungal testing. Our sterile formulations are compounded in a state-of-the-art clean room and compounding lab that was fully renovated and updated in the summer of 2014.

According to USP 797, multi-dose medication vials which have been opened (needle-punctured) should be dated and discarded within 28 days unless a shorter or longer date has been specified. If a multi-dose vial has not been opened or accessed, it should be discarded according to the beyond-use-date on the vial.

Therefore, we suggest ordering only what you plan to use within 90 days of receipt of order. This practice will greatly contribute to patient safety.

Due to evolving regulatory standards, some specialty sterile formulations will have short "Beyond Use Dates" and additional testing fees. Please contact us for additional formulations, strengths, dosages, and pricing.

| | Common Strength |
|--|-----------------|
| Alpha-Lipoic Acid (Original German Formula) | 25mg/ml |
| Acetyl-L Carnitine Injectable | 100mg/ml |

College Pharmacy

Professional Resources

Practitioner Resources

College Pharmacy is proud to offer a variety of professional services and resources to help simplify the process of introducing compounded medications into the clinical practice, increasing practice profits, and patient satisfaction.

The A-Z BHRT Practitioner's Guide & Beyond Basic BHRT Training Package: We have combined two popular resources to create an in-depth guide that includes information about compounded BHRT formulations, laboratory reference ranges, and BHRT research abstracts to help incorporate BHRT into your practice. Request your complimentary copy via our website: www.collegepharmacy.com.

Physician's Training Video For Pellet Insertion (DVD): When patients call us for practitioner referrals, they most often request a BHRT Pellet practitioner. This three part series includes testimonials from pellet patients, an in-depth interview with experienced pellet practitioner Dr. Jack Ford, along with live footage of the pellet implant procedure. Contact us directly to order your DVD today. (Price: \$125.00)

Additional Practitioner Resources

Prescribing Options

ePrescribing Through SureScripts: College Pharmacy has expanded our prescribing options by offering ePrescribing through SureScripts. Contact us to learn more about ePrescribing through SureScripts.

LifeFile / Fax / Telephone Prescribing: Call, fax or prescribe through LifeFile. Are you interested in setting up a LifeFile account? Contact us directly or visit our website for additional information.

Website Resources: Have you visited www.collegepharmacy.com? Our website includes many useful articles, downloadable order forms, and important information about our services.

Online Nutritional Supplement Center: Our online nutritional supplement center offers many hard-to-find pharmaceutical-grade professional supplement lines that are not readily available in many communities.

Patient / Practitioner Referral Program: All College Pharmacy practitioners are automatically enrolled in our patient referral program.

Nutritional Supplement Center Specialty Product Spotlight

NanobacTX is a patented non-prescription oral nanobiotic compound shown in published cardiology studies to help improve cardiovascular health and lipid profiles. Published IRB-Monitored, peer-reviewed cardiology clinical trial results show that NanobacTX helps improve vascular health, heart health and increases exercise ability. NanobacTX can help improve cardiovascular function, coronary blood flow and vascular flexibility.

Aesthetic & Mature Skin Formulas

The First "Ingredient" in our Aesthetic Medicine Formulations is Quality. Our Aesthetic Medicine Formulas are created using premium pharmaceutical-grade active ingredients that have been carefully selected for their synergistic properties.

The following list is a small selection of our most popular Aesthetic Medicine formulas. Please contact us for a more comprehensive list and additional information about the active ingredients used in these formulations.

Specialty Formulas

EPH Wrinkle Cream: Liposomal base containing Estriol, Vitamin C, Hyaluronic Acid, Phospholipid Complex.

Vitamin C & Glutathione Face Cream: Stable Vitamin C, Glutathione, and Hyaluronic Acid. (Available with Estriol.)

Resveratrol 5% / Renovage™ 3% Cream: Two dynamic ingredients combined for their synergistic properties in addressing aging skin.

- Beta Glucan 5% / Selenomethione 0.05% Cream
- Beta Glucan 3% / Estriol 0.3% Cream
- Dermal-C Cream (Over-The-Counter Product)
- Glycolic Acid 10% Cream
- Estriol Face Cream 0.5%
- Progesterone 1.5% Cream
- Melatonin1% Cream
- *There may be a short Beyond Use Date (BUD) on the formulations above. Contact College Pharmacy for more information

Nutritional Supplement Center Specialty Product Spotlight

Genus Serum Plus contains Curcumin with CoQ10 and Alpha Lipoic Acid. The two additional substances are strong anti-oxidants, that support the immune system and strengthen the heart.

Restore is a clinically proven dietary supplement to enhance your gut health so good gut bacteria can flourish. Restoring good gut bacteria and gut communication can strengthen tight junctions, repair immune function, reverse fatigue and reclaim mental clarity.

Psoriasis: Vitamin D3 Cream (10,000iu/gm), Clobetasol / Zinc Pyrithione Spray, Hydrocortisone 10% Cream.

Specialty Product Spotlight

Introducing Blend & Boost[®] Custom Skincare Line

Blend & Boost® is MEDISCA's new skincare product line made-to-measure according to clients' unique skin needs by blending a variety of cosmetic active boosters with advanced cream formulas. This high quality line is backed by the latest innovations in cosmetic science and dermatology. Blend & Boost® is offered exclusively to healthcare professionals and is only made available to their patients once they have undergone a professional skin analysis. The finished product is the first of its kind in cosmetics: a truly tailored and multifunctional solution specific to individual needs, regardless of age or gender, based on MEDISCA's philosophy of customized care. For more information visit www. collegepharmacy.com.

BHRT Dosage Forms: Specialty & Traditional

College Pharmacy is proud to offer a variety of professional services and resources to help simplify the process of introducing a BHRT program into the clinical practice. In addition to our services and professional resources, we provide healthcare practitioners with one of the most comprehensive selections of BHRT dosage forms available.

Lipid Matrix Sublingual Tablets: A College Pharmacy Exclusive. A quick and convenient bioavailable alternative to traditional oral capsules, while avoiding first-pass effect.

Fused Pellet Implants: Used for both women and men. Typically utilizes estradiol and testosterone. Inserted subcutaneously every 3 to 5 months.

Percutaneous Gel: A once-a-day application of percutaneous gel is usually sufficient.

Traditional Dosage Forms Include: PLO Gel, Thick Gel, Topical Creams, Oral Capsules, Oil-Filled Capsules, Vaginal Suppositories, Vaginal Creams and Ointments, Injectables.

Combination Dosing of Hormones: Hormones compounded into a gel, cream, sublingual tablet, or capsule can be combined into a convenient single-dose prescription.

Dosage Delivery: Gels are available in an airless metered pump bottle or an adapt-a-cap bottle and syringe. Creams are available in the Topi-Click[™] Dispenser, jars, and pre-filled syringes.

BHRT Fused Pellet Implants: For Women & Men

Convenient Flip-Top Fused Pellet Vials: easy-to-use, color-coded by ingredient.

College Pharmacy has been compounding BHRT Fused Pellet Implants since 1988. With over 25 years of experience, we pride ourselves on the quality of our compounding process as well as our expanding pellet selection.

Improved Order Processing Times & Product Sterility with E-Beam Technology! College Pharmacy has adopted e-beam technology to ensure our pellets meet

our strict USP 797 compliant sterility standards, while also allowing us to process orders more efficiently without delays in the traditional sterility testing process.

Compounding can provide alternate methods of delivery by combining the ingredients of traditional pain medications into topical penetrating gels and creams, topical sprays, injectables, suppositories, solutions/suspensions, nasal sprays/gels, troches, and specially compounded oral compounds.

Dosage Forms Available:

| Topical NSAIDs | Transdermal Gels |
|-----------------------|------------------------------|
| Concentrated Capsules | Sublingual Tablets & Troches |
| Suppositories | Mouth Rinses & Nasal Sprays |

Topical Creams & Ointments Extended Release Capsules Sterile Injectables

Topical Pain Management Benefits: Avoidance of the gastrointestinal tract; Avoidance of some side effects; Availability of multiple skin sites to avoid local irritation and toxicity; Improved patient compliance. College Pharmacy's topical pain formulations can be compounded with a base that offers an increased absorption rate (up to 6x more), allowing for minimal dosing.

Topical Formulation Combination Dosing: Up to seven different drugs have been combined to successfully treat pain in a number of disease states.

BioG MicroTabs: Advanced Nutritional Supplement Blends

Discover The Next Generation of Nutritional Supplementation.

BioG MicroTabs allow for easy mixing and dosing of multiple nutritional ingredient blocks (vitamins, minerals, essential fatty acids, anti-oxidants, amino acids, etc.) based on the individual needs of each patient.

Active Ingredients for Personalized Nutrition

Healthcare practitioners are able to properly evaluate the health and wellness needs of each patient and can then recommend a BioG MicroTabs ingredient blend according to the specific requirements of that individual.

- Foundation & Standard Blends recommended by College Pharmacy.
- Customized Standard Blends formulated by the healthcare practitioner.
- Personalized Patient-Specific Blends to manage specific conditions.

BioG MicroTabs Benefits & Overview:

- No need to purchase multiple nutritional supplements.
- Easy to swallow, easy to take with a small measuring spoon. Neutral taste.
- Improved transport and absorption through the gastrointestinal tract.
- Every MicroTab contains an exact amount of active nutritional ingredients.
- Preservative, Lactose, and Gluten-Free.

College Pharmacy Private Label Supplements

College Pharmacy offers a unique one-stop shopping experience by providing pharmaceuticalgrade nutritional supplements in addition to our comprehensive pharmacy services. Offering many hard-to-find, exclusive, or specialty supplements, College Pharmacy's online nutritional supplement center is a unique service for our customers. Many of the products that we carry are the result of customer requests or practitioner recommendations. Visit our online store at www.collegepharmacystore.com for more information about our private label nutritional supplements.

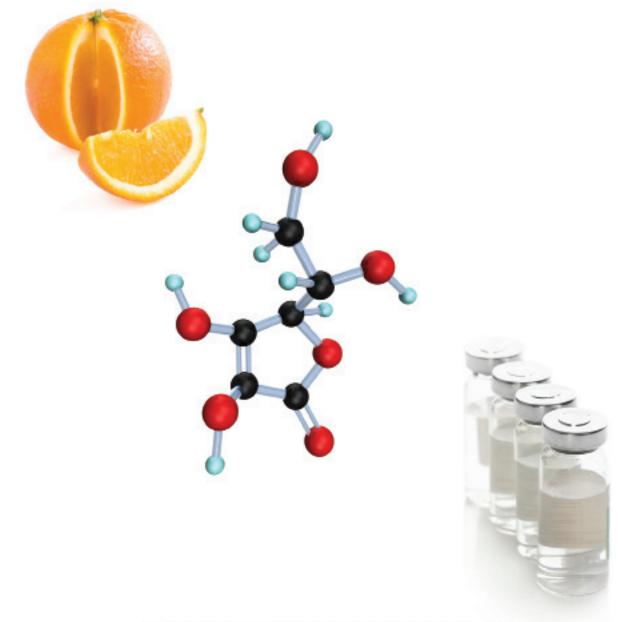

The College Pharmacy Compounding Quick Guide

uide ©2016 College Pharmacy

Our compounded formulations are the result of prescriber requests; the purpose of any information that you may receive is to illustrate our compounding capabilities. Please contact us for additional compounds that are not listed in this publication. We dispense prescription drugs only after receiving a valid prescription. Dispensing a prescription drug without a valid prescription is a violation of federal law. Statements have not been evaluated by the FDA.
