

Commonly Prescribed Autism Protocol Support Formulations Dr. Dietrich Klinghardt & Dr. Amy Derksen

IMPORTANT INFORMATION:

The following protocol support list represents formulations commonly prescribed by Dr. Dietrich Klinghardt and Dr. Amy Derksen in their practice. Dr. Klinghardt utilizes Autonomic Response Testing (ART) to determine which formulation to use and to create an individualized protocol for each patient. The listed formulations do not represent complete protocols and are not intended to suggest complete treatment. They should be shared with your healthcare practitioner before adopting into your health & wellness plan. Both doctors suggest an approach that adopts no more than one or two of the formulations listed under each condition, based on the recommendation of your healthcare practitioner. Always seek the advice of your healthcare practitioner before undertaking any diet, exercise, or other health & wellness program.
